Work experience

Brandmeup
Web Developer

May 2014 — Present

Lead developer of an online platform for professional networking. Developing with CakePHP and MySQL. Also responsible for the server maintenance and updates.

NIAEFEUP
Member

September 2013 — Present

Member of a students' association branch, developing small projects and ideas on our free time. As a member I led the Timetable Selector project and contributed to other projects like Kommando, UNI and Exam-Scheduler, organized and configured the network for 2013 students' association Lan Party and helped with the maintenance of our 10 year old computers working as our web-servers, git repositories, wikis and internal network routers.

Education

Masters in Informatics and Computing
Engineering
Faculty of Engineering of University of Porto
Current average 14.

September 2009 — Present (expected
February 2015)

Languages

Portuguese: Native
English: Full working proficiency
German: Basic proficiency

Projects

Guess me out: Ruby on Rails website that allowed dynamic avatar creation and matching different users to play against each other a game like "Guess who?"

Pay as you Go: ASP.Net website for a proof-of-concept system that allows insurance companies to register driver information through GPS systems and perform simulations and premium calculation using the new parameters.

Timetable Selector: webpage to allow U.P. students to simulate timetable selection before the enrollment period.

Interests

Parallel Computing, Artificial Intelligence, Computer Networking, Algorithms and Open-source.
Playing guitar on free time.
